SUMMARY

Data Science student specializing in Data Visualization and Analytics. Proficient in Python, SQL, and BI tools like Tableau and Excel. Experienced in ETL pipelines, predictive modeling, and building interactive dashboards that drive actionable insights in finance and sports domains.

TECHNICAL SKILLS

Languages: Python (Pandas/NumPy), SQL, JavaScript (ES6+), HTML/CSS

Visualization: Tableau Desktop, MS Excel (Pivot Tables/Charts), Power BI, Google Sheets

Data Stack: MySQL, MongoDB, PostgreSQL, Git, Postman, Vercel

Analytical Techniques: EDA, ETL Pipelines, Statistical Analysis, Risk Modeling, Feature Engineering

PROJECTS

Loan Default Risk Analysis Dashboard

Feb 2026

Tools: Excel, Pivot Tables, Conditional Formatting, Feature Engineering, Risk Assessment

- Analyzed 148K+ loan applications to identify default risk predictors; processed 24,999 records for modeling.
- Engineered 'credit_score_band' and 'ltv_ratio' features, improving risk segmentation and trend clarity by 40%.
- Performed advanced data cleaning including median imputation for outliers and standardized categorical distributions.
- Developed a dashboard answering business questions on demographics and regional risk, identifying DTI > 50 and LTV > 120 as the strongest predictors for default risk assessment.

FIFA World Cup Analytics & Performance Insights

April 2026

Tools: Python, Tableau, Statistical Testing (ANOVA/T-Tests), ETL Pipelines

- Engineered a Python ETL pipeline to merge and clean 37K+ player records and 4K+ match entries (1930-2014).
- Conducted statistical hypothesis testing to quantify 'Home Advantage' impact and stage-wise scoring difficulty.
- Extracted player disciplinary data and goal contributions from semi-structured event strings using complex RegEx.
- Built a high-fidelity Tableau dashboard tracking long-term attendance growth and team consistency scores.

EXPERIENCE

Full Stack Intern - Deltechs InfoTech Pvt Ltd (Drona HQ)

May - July 2025

- Optimized MySQL queries and schema designs, achieving a 20% improvement in application load times.
- Engineered RESTful APIs ensuring efficient data flow between React.js components and backend services.
- Collaborated in an Agile team, utilizing GitHub for version control and participating in code reviews.

EDUCATION

B.Tech in Data Science - Newton School of Technology

GPA: 7.1/10.0 | 2024 - 2028

B.Sc in Data Science - IIT Madras

Pursuing | 2025 - 2029

ACHIEVEMENTS

- Qualified in 400+ problems on LeetCode; achieved a consistent 1000+ rating on Codeforces.

- Participated in Smart India Hackathon (SIH) and HackaPirate, solving complex engineering challenges.
